Between June and October, the Oregon Department of Transportation will repave seven miles of Oregon 99W between OR 240 in Newberg and Oregon 18 (McDougal Junction). This work will remove and replace old pavement, guardrails, construct updated ADA ramps and sidewalk in Newberg, and update some signage to improve overall safety and driving conditions.

Project Details:

• Construction June through October 2014.
• Seven miles of pavement restoration (does not include Dundee city limits, which will occur in 2015).
• Night work – Repaving work will occur Sunday through Thursday nights from 8:00 p.m. to 4:30 a.m.
• Up to four weekends of work in Newberg for rebuilding the railroad crossing near SW 1st St.
• One lane in each direction closed during paving.
• Late night delays expected; allow extra travel time.
• Driveway accesses maintained.
• Sidewalk curbs at intersections will be retrofitted in Newberg to comply with Americans with Disability Act; daytime work will be allowed on sidewalk improvements.

Is this related to the Newberg-Dundee Bypass?

No. The pavement preservation project being completed this summer is not related to the Newberg-Dundee Bypass, which is also currently under construction. The Oregon 99W paving project maintains the existing highway. The Newberg-Dundee Bypass will be a new road. The first phase of the bypass being constructed is a four mile two lane roadway between Oregon 219 in Newberg and Oregon 99W, just south of Dundee. For more information on that project, visit: www.newbergdundee.org
Night Work Planned on OR99W

The Oregon Department of Transportation will repave seven miles of Oregon 99W between Oregon 240 in Newberg and Oregon 18 (McDougal Junction) between now and September 30th. This is a pavement preservation project – crews will remove and replace old pavement, guardrails, and update some signage to improve overall safety and driving conditions.

The project does not include repaving through the City of Dundee. The City of Dundee and Oregon Department of Transportation are currently developing a separate transportation improvement project along Oregon 99W through the City of Dundee; that project will include stormwater, landscaping, and pedestrian improvements as well as new pavement. The work within the City of Dundee will begin in 2015. The current paving to the south and north of Dundee will be complete in September.
