Temporary closure of northbound I-5 on ramp planned at Woodburn Interchange
OR 214 motorists to use new loop ramp to access I-5

WOODBURN – The northbound on ramp to I-5 at the Woodburn Interchange will be closed starting at 8 p.m. on Wednesday, Jan. 7, 2015 so the contractor working for the Oregon Department of Transportation can begin rebuilding the ramp as part of the interchange project.

While the ramp is closed for construction, westbound OR 214 motorists will use the new loop ramp to access I-5 northbound from a signalized dedicated left-only turn lane. This is a temporary alignment until the northbound I-5 on ramp (for westbound OR 214 motorists) is completed later in 2015.

As with all the traffic shifts and new ramp opening, it may take a day or two to become familiar with the new configuration. Signs will be posted warning motorists of the changes. As with all the alignment changes on this project, motorists should proceed with caution and follow the signs and striping through this area.

While the project has made significant progress since construction started in the summer of 2013, there is still plenty of work to do including the construction of: two more ramps; sidewalks and curbs; driveways; illumination; bridge rails; traffic signals and landscaping.

Motorists will continue to drive through an active construction zone and should proceed with caution.
